

Same both sides

$$8 + 5 = \square + 12$$

$$6 + 4 = 3 + \square$$

$$8 + 4 = \square + 1$$

$$7 + 2 = \square + 7$$

$$16 + 1 = 10 + \square$$

$$19 + 3 = \square + 2$$

What is wrong here?

Are they the same both sides?
