

## Maths week 1 activity 2

### Exploring money and worth

Have a look at the pictures below. Have a discussion with an adult about the following questions...remember, there is no wrong answer! The aim of this is to explore your understanding of money and worth. If an adult is able to record some of your discussion or ideas, that would be great! How do the different picture cards relate to money? Where does the money come from each time and why are the children/adults getting it?

Picture 2

Picture 3

Next, have a look at these people who all have different jobs. All people earn different amounts of money depending on which job they have. First, work out which job each picture is showing. Then, order the jobs from highest earner to lowest earner. Remember again, no answer is wrong! This is about your understanding and reasoning skills. If you would like you, you could add another job in the blank space. Again, if an adult is able to record some of your discussion that would be great.
