

Hi Emerald class, we hope those of you at home are staying safe and keeping busy. We miss having all the class together at school.

Numeracy:

Remember these are differentiated between 'mild' and 'hot'

Day 1: Multiply and divide decimals by whole numbers

Day 2: Ratio and scaling problems

Day 3: Create, describe and predict patterns

Day 4: Written multiplication and division

Day 5: Pythagoras theorem

Literacy

We have uploaded a literacy 'Read and Respond' booklet which is to last you for the next 2 weeks. Do the first 5 activities this week:

Synonym and Antonym Compasses

Use adjectives from the last book you read to expand your vocabulary. Start with an adjective from the book at the top. Write the antonym below. Next, write a synonym to the left and an antonym opposite. Use a thesaurus if you need to.

About Me

If the main character of the last story you read created a social media page, what would it say? Fill in their profile, making sure to include as much information as possible about them.

Sensational Settings

Write a setting description of the most interesting setting from the last book you read. You can magpie good vocabulary from the book but make sure your writing is your own. Don't forget to use all the key grammatical features.

Fabulously Flawed

Design a character that would fit well into the last story you read... but there's a catch. Your character must have a flaw in their personality which would affect the story's plot. Write their flaw inside the body and write about their appearance, actions and how they fit into the story around the outside.

Change It Up

Create a storyboard outlining the plot of a brand new story which has the theme of 'change'. However you interpret change is up to you. It could be bad to good, happy to sad or something more sinister entirely. Don't forget to add labels and captions to explain the plot.

PE

Try some of the Virtual Summer School games challenges on the school website.
