

Monday 9<sup>th</sup> November 2020

Good morning Opal Class,

I hope you enjoyed your weekend and managed to get some fresh air. This is the start of a brand new week - let's think positive and make it a good one! 😊 I'm excited to see the learning that you complete this week. Remember, you can always ask me for help if you need it. Just do what you can! Also, remember to get some exercise whether this is running, dancing, playing in the garden or going for a walk.

Have a read of the instructions below for each lesson and activity. Try your best and remember - I like mistakes...they mean you are learning! (FAIL = First Attempt In Learning)

English/Phonics	Please watch the Letters and Sounds input video on the phase 5 sound 'ay' that we learnt last week ( <a href="https://www.youtube.com/watch?v=WpvquS6c5vk">https://www.youtube.com/watch?v=WpvquS6c5vk</a> ) Then, complete the 'ay' phonics worksheet. I have provided the answers at the bottom of the sheet. Can you write some funny sentences using the sound 'ay'? For example 'Today I am going to say look at that hay in a tray far away.' Make it as fun as you can! Then, go onto the website 'Phonics Play -> Resources -> Buried Treasre -> Phase 5 -> ay'. Read the word (by segmenting and blending) and then work out if it belongs in the treasure chest (real word) or the rubbish bin (made up word). You can also revise your Phase 4 sounds by clicking on 'Phase 4 -> Revise all Phase 4'
Maths	Carry on with your learning about subtraction from Friday. Watch the video from White Rose ( <a href="https://vimeo.com/468246766">https://vimeo.com/468246766</a> ) and the Dinosaur subtraction Power Point first. Today you can choose your challenge sheet (complete sheet 1 if you're feeling a bit unsure and sheet 2 if you're feeling more confident). I'm including an answer sheet so that you can mark your work yourself. Remember, you don't have to work any of this out in your head or on your fingers. Grab some objects that you could use to physically show what subtraction looks like. Use toys, marbles, conkers, spoons...anything that is small, accessible and can be moved! Alternatively, you can cross objects out when you 'take away' as the video shows you.
Topic (Science)	On a Monday afternoon you usually have Mrs Kite teaching you Science or D&T. Today, it is a Science lesson on Materials. Please have a look at the Science lesson and PowerPoint that Mrs Kite has left for you. Have fun!
