

Good Morning Emerald Class,

We hope that you had a lovely weekend and you managed to enjoy the great autumnal weather. We know that this is a very strange time but stay optimistic and try to stay safe. We look forward to seeing the work that you produce every day this week.

Today we have set 3 pieces of work for you: English, Maths and Geography (as this is what we would usually do on a Monday).

English: Your work will be based on the war poem, In Flanders Field. You can choose what you create based on the poem.

Maths: In maths, we will continue to work on statistics (which is mainly graphs and data). In today's lesson, you will be doing a lesson based called 'Comparison, sum and difference'. For the lesson you will look at a variety of sets of data (graphs, tables etc) and learn how to compare, add and find the difference using the information given.

Don't forget that you still have access to TTRS – We will be able to see your progress from our laptops 😊

In class, we usually do arithmetic every day. To keep your arithmetic skills finely tuned, you can use this website <https://www.topmarks.co.uk/maths-games/daily10> you can choose your level of difficulty and the areas which you feel like you need to work on.

If you would like feedback on your English and Maths work, please upload them (or email to the office) by 12pm.

Geography: This lesson is from the Oak Academy. It is a continuation of the work that we started last term on water (water cycle, rivers and coasts). We are going to learn more about 'Why are rivers important to people?' We will be looking at two case studies in the lesson today - the Volga River in Russia and the Amazon River in South America.

If you would like feedback on your Geography work, please upload it (or email to the office) by 3pm.

Remember that our value this term is compassion – which is very important at this really tricky time. So think about what you can do to show those around you that you care.

You also need to look after your own well-being. Try to get outside today and have a walk, even if the weather is a bit wet. You'll feel the benefits of exercise and being with nature.
