

## Draw

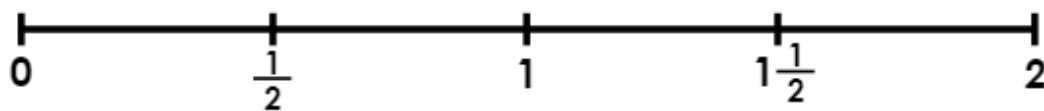

**Position the age of each child on the number line.**

Francis: 18 months old

Amy:  $\frac{1}{5}$  year old

Zoe:  $1\frac{3}{4}$  years old

Cruz: 15 months old

## Explain

$\frac{1}{5}$  of 15

Nia's method

'5 equal groups, the answer is 3.'

Fern's method

'5 per group, the answer is 5.'

I agree with Nia

I agree with Fern

Explain:
